Joyful Delights Bakery Website Project Proposal

1. Organisation Overview

- **Name:** Joyful Delights Bakery
- **Brief History:** Joyful Delights Bakery was established in 2015 as a small neighbourhood bakery focused on fresh, high-quality baked goods using natural ingredients. It has grown steadily by building a loyal local customer base.
- **Mission and Vision:**
 - Mission: To provide delicious and wholesome baked treats that bring joy to the local community.
 - Vision: To expand Joyful Delights Bakery's reach by creating an accessible online presence that connects with more customers.
- **Target Audience:** Local families, individuals who appreciate fresh baked goods, and event planners seeking custom cakes and pastries.

2. Website Goals and Objectives

- Increase brand awareness and reach more local customers.
- Provide detailed information about products and services.
- Enable customers to place orders or make enquiries online.
- Showcase special offers and custom cake options.
- Improve customer engagement through easy navigation and appealing design.

3. Current Website Analysis

- Joyful Delights Bakery currently has **no website**.
- This limits their ability to reach customers beyond foot traffic and word-of-mouth.

4. Proposed Website Features and Functionality

- Homepage with welcoming hero image and introduction.
- About Us page highlighting the bakery's history, mission, and team.
- Products page featuring bread, cakes, pastries with descriptions and photos.
- Enquiry form for orders, custom cakes, and general questions.
- Contact page with bakery location(s), phone number, and map.
- Mobile-friendly responsive design for customers using phones/tablets.

5. Design and User Experience

- **Overall Design Aesthetic and Branding:**
The website will feature a warm and inviting design reflecting the bakery's cozy and

friendly atmosphere. Soft browns, creams, and pastel accent colors will be used to evoke the feeling of fresh baked goods. The branding will focus on simplicity and warmth to appeal to local families and customers.

- **Colour Scheme:**

- Primary: Soft cream (#FFF8F0)
- Secondary: Warm brown (#5A3E1B)
- Accent: Pastel peach (#D9B382)

- **Typography:**

- Headings: Friendly, rounded font such as "Poppins" for a welcoming feel.
- Body text: Clean, readable font like "Arial" or "Helvetica" for clarity and accessibility.

- **Layout and Design Approach:**

The layout will be simple and intuitive with a clear navigation menu at the top of every page. The homepage will feature a hero image with a call-to-action. Content pages will use sections with headings and images to keep the user engaged.

- **User Experience Considerations:**

- Easy navigation with consistent menu links across pages.
- Responsive design to ensure accessibility on phones, tablets, and desktops.
- Clear call-to-action buttons like “Order Now” and “Contact Us.”
- Fast loading times with optimized images and minimal clutter.

- **Wireframes:**

Low-fidelity wireframes will be developed to visualize page layouts including homepage, product listings, enquiry form, and contact page to ensure a logical flow and user-friendly experience.

Week	Milestone	Description
------	-----------	-------------

1	Research & Content Gathering	Collect information about Joyful Delights Bakery, products, and images.
2	Sitemap & Wireframe Design	Create sitemap and develop low-fidelity wireframes for all pages.
3	HTML Structure Setup	Build basic HTML pages (index.html, about.html, etc.) with placeholder content.
4	Content Integration & Styling	Add real content to pages and begin CSS styling.
5	Testing & Debugging	Test website across browsers and devices; fix any issues.
6	Final Review & Submission	Final adjustments; prepare files and submit project.

6. Technical Requirements

- Hosting and domain registration suitable for a small business website.
- Development using HTML, CSS, and basic JavaScript for interactivity.
- Responsive design for cross-device compatibility.

8. Budget

- Estimated hosting cost: R150 per month (shared hosting).
- Domain registration: approximately R250 per year.
- Development tools: Free (Visual Studio Code, GitHub).
- Design assets: R700 photography for bakery's original photos.

Wireframes

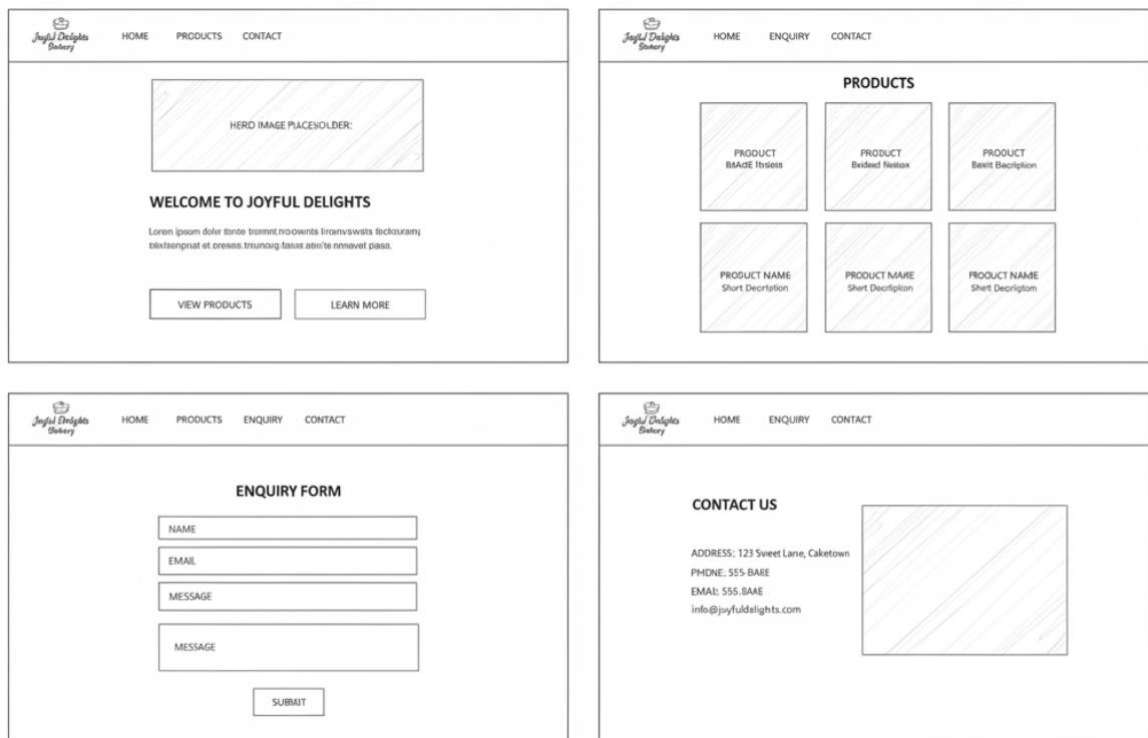

Low-fidelity wireframes will be created to outline the basic layout and structure of the website pages. These wireframes act as blueprints to visualize how content and navigation will be organized, ensuring a smooth and intuitive user experience.

The wireframes will include:

- **Homepage:**
Layout with a hero image, brief introduction, call-to-action buttons, and navigation menu placement.
- **Product Listings Page:**
A clean grid or list showcasing bread, cakes, and pastries with images, names, and short descriptions.
- **Enquiry Form Page:**
Simple form layout with fields for name, email, message, and a submit button, designed for easy input.
- **Contact Page:**
Clear display of contact information and an embedded map, ensuring users can easily find the bakery location and reach out.
